PSI Process Congratulates John Corkery on his New Role

Effective January 2024, Municipal Sales Manager John Corkery, will be retiring from his full-time position at PSI. However, he will continue to assist PSI into the future.

John has served PSI with distinction for 36 years of his 48-year career in the water industry and was key to the success of PSI's vision and growth during his tenure. His contributions helped build PSI's impressive list of wastewater and stormwater pump station installations and helped position PSI as an industry leader. John also led several high-profile emergency bypass pumping projects for emergency infrastructure repairs and disaster recovery efforts across the region and was key to developing relationships with key customers and manufacturers.

"John's vast experience and knowledge of the local market helped grow PSI to the company it is today" said PSI President Bryce Parkhurst. "I want to personally thank John for his many contributions to the company, his service to our leadership group, and his decades of support of NJWEA and the Water Environment Federation."

John will transition from his full-time position at PSI to a consulting role and will continue to serve the New Jersey Water Environment Association, and the Water Environment Federation as a Delegate.

All of us at PSI wish John a long and healthy retirement!

About PSI Process

Celebrating more than 50 years in business, PSI Process / Pumping Services Inc. (PSI) is a privately held, employee-owned company, headquartered at its 45,000 square-foot facility in Middlesex, New Jersey.

PSI Process is a stocking distributor and service center for Flygt, a xylem brand, and a manufacturers' representative for leading manufacturers of collection systems, wastewater screening, wastewater biological treatment equipment, wastewater monitoring and control, wastewater treatment clarifiers, and scrubbers, tertiary filtration, water treatment, wastewater mixing and aeration, controls instrumentation, UV disinfection, submersible and dry pit storm and wastewater pump stations, sludge dewatering and thickening equipment.

The company supports an extensive aftermarket service operation including rental of pumps and related equipment for emergency pumping to the municipal, construction, industrial, and commercial markets in New Jersey and New York.
